

Nederman Group, Q4 2022

Nederman

Stable end to the year:

- Record year for sales and profit for the Nederman group
- Three of four divisions reported order intake growth vs Q4 2021
- We continue to deliver on a high order backlog Q4 saw record quarterly sales
- Quarter 4 2022 saw second highest quarterly EBITA level ever
- EBITA margin lower than Quarter 3 Inflationary pressure and some operational challenges
- MBE AG acquired in quarter Distributor for M&CT division

Continued concerns:

- Continued uncertainty
- Order intake growth rate is slower
- Clear cost inflation
- Geopolitical concerns continue
- Chinese situation continues to cause challenges

Dividend

• The Board of Directors proposes a dividend of SEK 3.75 per share (3.50)

Q4 2022: 88m SEK (159m) Jan-Dec 2022: 346m SEK (520m)

Net Debt:

31 December 2021: 1,068m SEK 31 December 2022: 1,477m SEK

Cash flow from operating activities, SEKm

The divisions

Extraction & Filtration Technology, Q4 2022

Development during the quarter

Orders & Sales:

- 3 major orders > 5m SEK were registered None in Q4 2021.
- Order backlog at record year-end level
- Major orders:
 - Food in US and Brazil
 - RoboVent to the electric vehicle industry
- Increased orders from industries with anticipated long-term growth. Examples:
 - Paper recycling in the Netherlands
 - Battery recycling in Australia
 - Chinese customer in the wind power industry
 - Waste and plastic separation
 - Electric vehicle industry
 - Defence
- Sales increased in all regions and in all sales channels

Regions:

- Strongest regional trend was in Americas, not least due to RoboVent
- In EMEA, sales and orders received increased in most markets
- APAC had good growth in total but was negatively impacted by the covid-19 situation in China

Key activities

- Launch of Nederman SAVE, a solution comprising software and a package of services that enable significant energy savings for customers.
- Introduction of the division's online store to a number of APAC partners
- The integration of RoboVent continues Nederman now has a leading position in the welding segment in both the US and Europe

Currency

Process Technology, Q4 2022

Development during the quarter

- Good sales following strong orders received in previous quarters
- Order backlog heading into 2023 at record year-end level
- Service business continued to grow
- Concerns that global economic uncertainty will dampen customer willingness to invest
- Supply chain was again negatively impacted by the covid-19 situation in China

In Textile & Fibre:

- Sales were strong with a slowdown in orders
- China continues to pose the greatest challenge
- Customers have been increasing investments in other markets, including India
- Higher raw material prices and a weaker macro-economic trend will likely lead to reduced textile investments moving forward

In Foundry & Smelter:

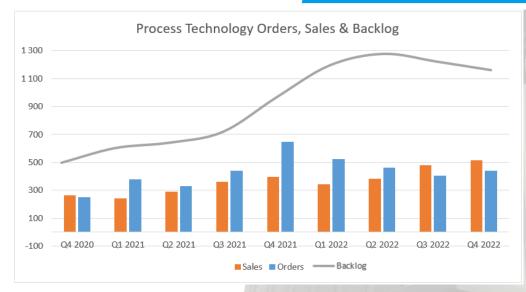

- Increased demand and positive trend in aluminium recycling
- Several major projects were registered in the segment
- Increased defence spending could increase foundry demand

In Customised Solutions:

- 2 major orders, for metal recycling and in the energy sector were booked
- · Quotation pipeline is strong

Nederman

Key activities

- Working capital position remains strong healthy orders received with the resulting downpayments
- Selective price adjustments to defend margins against rising material and energy prices and general inflation

Monitoring & Control Technology, Q4 2022

Development in the quarter

- Orders received increased, particularly in the process industry
- Order backlog heading into 2023 at record level
 - Clear base for continued sales growth in coming quarters
- China a concern:
 - Demands to allow only domestically produced products
 - Covid-19 related events
 - Reduced turnover not yet fully compensated for elsewhere
- Challenges remain in component supplies negative impact on production capacity and profitability

In EMEA:

- Growth in orders received and sales
- Growth primarily driven by NEO Monitors
- Gasmet saw some delayed emissions monitoring projects and an overall slowdown, although UK performed well

In APAC:

- Orders and sales declined in total
- Gasmet still negatively impacted by the situation in China
- Neo Monitors had a more positive trend, driven by petrochemical

In Americas:

- Sales and orders grew significantly vs Q4 2021
- NEO Monitors' had strong growth Driven by investments to improve efficiency and to reduce dependence on imported energy
- Auburn FilterSense's sales in particle monitoring increased well

Key activities

 Acquisition of MBE AG, selling gas measurement instruments in the Swiss market and has been a Gasmet distributor for many years

Duct & Filter Technology, Q4 2022

Nederman

Development in the quarter

- Growth in sales and orders vs Q4 2021
- Increase primarily from the strong performance in Europe
- Profitability positively affected by higher sales volumes
- Negative impact from some ducting production issues in the USA

In Nordfab:

- Continued healthy order growth
- Clear variation between the regions
- US orders received decreased vs Q3 2022 but strong growth for whole year
- Orders from battery production continued
- Good growth in Europe New 2 metre ducting performing well including a major UK order
- Sales growth in Australia, Thailand declined slightly

In Menardi:

- Slowdown in orders received seen in Q3 continued
- Order backlog still good continued healthy sales
- Quotation pipeline remains strong

Key activities

- Construction of the expanded Nordfab factory and warehouse building in the USA continued:
 - Opening scheduled for early April 2023
 - 9,000 m2 solar panels to generate 50% of energy needs
- Continued work to renew and upgrade older manufacturing equipment in Europe and the US.
 - Reducing risk of production bottlenecks
 - Improving efficiency and quality

Nederman

Outlook

Short term

- Demand and orders received in the Q4 were generally good
- Rate of growth has slowed from first half of 2022
- Order backlog heading into 2023 is solid
- Challenges including inflationary pressure, and economic and geopolitical uncertainty are impacting customers' investment decisions
- We remain cautiously optimistic towards the coming quarters

Long term

- Nederman's long-term potential continues to strengthen
- In a world in which insight into the damage that poor air does to people is increasing, Nederman, with its leading industrial air filtration offering, has a key role to play
- Technological advances, centring around digitalisation, have led to completely new possibilities to streamline and optimise the air filtration process.
- Together with political insight and a willingness to set stricter limits and legislation, there is
 a basis for a viable future manufacturing industry that contributes to sustainable air quality
 around the world.
